Work History

CodeCraft School of Technology

May 2017 - Present

Teachers Assistant | Mentor / Tutor

Full Stack Web Development Boot Camp

Meet with current students to help them understand more difficult concepts, plan their projects, and help in general. Helping prepare lesson plans, materials, exercises, and support for the students and teachers. Setup and management of events.

- **Teaching Experience:** Explaining difficult concepts to students from all different backgrounds and experiences.
- **Development:** Helped re-build the student portal using new technologies with reporting for the state and student contribution in mind.

Family Genie

September 2016 - May 2017

Full Stack Developer

Web application for genealogical data management and mapping.

Creating React components and Redux actions and reducers utilizing immutable Javascript. Writing Node API calls to manipulate the Mongo Database and return information to the front end. Writing python scripts to parse data from other file types into JSON format for the application. Constantly involved in troubleshooting and debugging.

Technologies include: Node, React, Mongo, Python

- **Workflow and Best Practices:** worked with a small team in a semi-Agile environment, utilizing tools such as Git and Trello to track and tasks and collaborate on the project.

Forman Consulting

October 2016 - Present

Consultant / Developer

Technical consulting services for businesses

Consult with customers to design and implement software solutions to meet their business needs.

- **Self motivation:** work mostly solo on projects, checking in with manager and customer to report progress.

A Touch of Class Tree Service

March 2015 - May 2016

Groundsman

Tree trimming and removal for home and commercial clients.

Support for climbers and trimmers, providing safety and equipment upkeep.

- **Teamwork:** Interacted with a team of up to 8 people to ensure client satisfaction and that the finished work was aesthetically pleasing.

RELEVANT PROJECTS

DevFaction Meetup:**Co-Founder and Organizer**

devfaction.com

Meetup group for anyone in the tech industry. We provide both a lecture and a tutorial every event and meet about once a month. Beginner to intermediate presentations on topics such as "Tips and Tricks for Working in the Tech Industry", and "How to Build a Simple Node Server".

CodeCraft Cheat-Sheet DataBase:**Team Manager, Developer**

github.com/KingEdwardI/Hackathon_CodeBase

CodeCraft Hackathon project, Stack Overflow combined with W3 Schools and Reddit. Team Leader, engineered back end design, front end animations. (2016)
